

# Logical Answers, Inc.

## Corporate Profile

491 Leetonia Avenue, Troy, Michigan 48085-5518

Phone: (248) 528-1742

## Company Overview

Logical Answers Corporation provides contract-programming services to clients implementing object and client server technologies throughout the nation with emphasis in southeast Michigan. James Wong and Lisa Younger founded the software development and contract-programming corporation in July 1992.

Logical Answers' core IT service offerings include:

- Full Lifecycle Software Development.
- Technology Consulting, Mentoring and Education.
- Software Application installation, distribution and maintenance.

Logical Answers' has extensive expertise in the following key technology areas:

- Object and Web technology including Java, Smalltalk, scripting languages and HTML.
- Enterprise Applications Implementations
- Cryptography and Security
- Network architecture and Telecommunications

Logical Answers has a proven track record for producing high-quality software systems. We accomplish this by utilizing superior programming skills and experience those results in efficient business processes and timely implementations.

## **The Principals**

### **James H. Wong, President & Co-Founder**

James Wong, President and consultant, has been involved in technology field for over twenty-five years. After completing a Masters of Science degree in mathematics and computer science, he joined IBM Corp designing and implementing software for almost 10 years. Founding Logical Answers Corp in 1992, he has provided technical consulting/programming services to clients providing their business with a competitive edge. Projects completed varied from software distribution and client-server to business applications such as mortgage underwriting and insurance claim processing. Clients include organizations such as IBM, Equitable of Iowa, Source One Mortgage Services Corp., Blue Cross/Blue Shield of Michigan, Comerica Bank, Amerisure Companies, Jackson National Life Insurance, and City of Detroit.

### **Lisa C. Younger, CFO & Co-Founder**

Lisa Younger is Chief Financial Officer and consultant of Logical Answers Corporation and has been involved in technology field for over twenty-three years. Prior to forming Logical Answers, she joined IBM for over 9 years. Earning a Bachelors of Arts degree in telecommunications, she has provided technical consulting/programming services to various businesses throughout the country. Projects completed varied from software change management and client-server to business applications such as mortgage underwriting and insurance claim processing. Clients include organizations such as Blue Cross/Blue Shield of Michigan, Equitable of Iowa, Source One Mortgage Services Corp., Amerisure Companies, The BlackHouse Group, Jackson National Life Insurance, and City of Detroit.

### Product and Project Abstracts

All the products were built using some or all of the following technologies: Eclipse IDE Developer, SUN Java Runtime Environment, Bouncy Castle Cryptographic libraries, Microsoft Visual Basic, Microsoft Visual C++, IBM DB2, Apache Derby Encrypted Database.

**DocuArmor Encryption Family:** Offering a family of secure commercial applications that allows individuals, groups or companies to encrypt/decrypt data files using drag and drop. Encryption provides protection for confidential/personal information or intellectual assets regardless if the information is stolen. DocuArmor prevents unwanted access to any of your files and includes the ability to exchange encrypted e-mail attachments to multiple friends/peers/associates. DocuArmor physically separates the encryption keys from the file allowing the user to store the keys in a secure place and carry their keys and application on a USB Flash drive. The enterprise edition allows groups/companies to generate, track and manage the encryption keys and certificates used in PKI technology.

**DocuArmor Finance Manager:** A secure commercial application that allows individuals or groups to add and track your investments as well as real estate, insurance, valuables, etc. If you own or want to research securities such as stocks or mutual funds, a *high speed internet connection is required* to allow DocuArmor Finance Manager to retrieve real-time quote information. The Budget module manages your monthly income and expenses and lets you know where your money is being spent. DocuArmor encryption will prevent unwanted access to any of your financial information. Installable on a USB Flash Drive or personal computer.

**DocuArmor Personal Health Records:** A secure commercial application that allows individuals or groups to carry their personal health information in a secure encrypted file on a USB flash drive. Information such as prescriptions, allergies, immunizations, emergency contacts, doctors, insurance, etc. can easily be retrieved and updated. DocuArmor PHR is easy to use, small enough to fit on a thumb drive and protected by encryption. Just plug it in a PC and launch the application.

**DocuArmor Inventory:** A secure commercial application that allows individuals or groups to collect and index your contents information and pictures at home in a secure database on a laptop computer or USB flash drive. Each item description can be associated with images along with a running total of costs that can be used for insurance purposes. Inventories are encrypted but can be exported in multiple formats (CSV, XLS) should the user wish. Inventory Management is easy to use, small enough to fit on a thumb drive and protected by encryption. Just plug it in a PC and launch the application.

**DocuArmor Messenger:** A secure commercial application that allows individuals or groups to exchange confidential messages using Secure Sockets and Encryption. Directly connect (easily) to others using a secure line (SSL)... NO copies are deposited on ANY message server. Easy to use and you control who can call. An on-line calling card directory service is available to dynamically exchange connection information and updates.

**DocuArmor Assistant:** A secure commercial application that manages contact information of individuals and companies. DocuArmorAssistant allows storage and display of photographs while providing the ability to record relevant notes, collect corporate information, interface to Microsoft products such as Outlook, Excel, etc.
